

# überfrost®

## CLEAR ULTRA FROSTED FINISH

- change clear glass to frosted in a smooth, even coat
- apply our simple technique to fashion textured, salt-blasted glass
- use over colored glass or glass tinted with our Just For Flowers® or TintIT® sprays
- turn glossy color surfaces matte

Salt-blast Technique on Sapphire-Tinted Glass

Salt-blast Technique on Clear Glass

Straight-from-the-Can Smooth Frost Finish

Frosted, Sapphire Ombre-Tinted Glass

## Salt-Blast Technique

START with überfrost, baking soda and a clean vessel of choice.

**1** Apply überfrost 8" away to a section of the glass.

**2** Immediately sprinkle baking soda onto the wet überfrost.

**3** Repeat 1 & 2 to cover all areas. Let dry. Topcoat with überfrost.

## Spray Tips®

- Chilled baking soda creates more texture variance. Store baking soda in the freezer before using.
  - Use überfrost as a clear ultra-matte finish on non-glass surfaces to quickly change glossy colors to matte.
  - Make shiny metallic finishes matte with 2 light coats of überfrost.
  - Try the Salt-Blast finish on non-glass surfaces (see gold plastic urn, right).
  - Mask a pattern in painters' tape to create stunning effects (see right).
  - Decorative Finishes on Glass are best not stored in refrigeration. Advise cooler storing bouquets in stock vases. Before delivery transfer to the customized vase readied with fresh water.
- Bonus: no sweaty vase and clean presentation to recipient.
